

Front End Developer

About this job

Location : Team of Remote Engineers

Job type: Full-time

Experience level: Junior to mid level

Industry: Software Development

Company size: Seed funded startup (handful of employees)

Experience : 2 to 7 Years

What do we do? We are an early seed funded startup in the eCommerce reseller space. It's an exciting and hot area which enables cross channel Commerce resellers to manage both productivity and growth across multiple channels from a single dashboard.

What kind of people will I work with? The Technology leadership team consists of Veterans in the industry who have worked and led teams across the Silicon Valley, India and EU/UK and have led development of World Class Products including several RDBMS, VOIP technology, leading Anti Virus, SaaS B2B and B2C Apps. We are sure it will be a very fulfilling experience to work with this team.

Is this the right job for me? If you like ground floor startups, are confident about yourself and like to solve problems and research things . If you are a quick learner under some supervision. This is the job for you. Like all startups you will have to wait for the reward but we are fairly confident we will be there with plenty to harvest and share.

Must Have

Strong Experience in Front End technologies(HTML, CSS, Angular/React, JavaScript, JQuery)

Good eye for aesthetics: layout, grid systems, colors, typography etc.

Full Stack experience and must have a sense for the back end.

Should be in Sync with latest design standards and trends

Experience working closely with Product and UX team and effectively translate the design into working code and improvise as appropriate.

Serial Problem solver, self starter and independent

Ability to communicate in English

Nice to Have

Have some remote work experience or an understanding of what it entails

Some exposure to and use of Design Patterns

Should have seen Scale in previous work experience

We plan to build a culture of technology and need Passionate people
